Steam Generator Models: SMP-12 and SMP-15

Features
Limited Lifetime warranty - 2-year in home labor warranty where available
Proportional Steam
Microprocessor based diagnostics and LED indication
Stainless Steel Tank Construction
Intelligent control communication
UL/CUL Listed

Required Equipment
TSC Control

Required Electrical Service
Dedicated circuit required: See Specification Chart for proper electrical requirements

Product Information
Water Supply - ¾” Compression Fitting, 120 PSI Max
Steam Outlet - ¾” Brass NPT male thread
Pressure Relief Valve - ¾” NPT female thread
Drain Outlet - Capped ½” Brass NPT male thread
Supplied with a 35’ control cable

Generator
Weight - 41 lbs.

* Refer to sizing guidelines to accurately determine the proper size generator for the installation.

90°C copper wire is required for generator connection. Installation shall be in accordance with NEC and local electrical codes.

Installation Notes
For optimum performance, the steam generator should be mounted as close as possible to the steam room. If needed, the steam pipe may be up to 50’ long.
Steam Generators should be accessible for service.
Do NOT install near flammable material such as paints, thinners, gasoline, etc.
Steam generators must NOT be installed outdoors, in moist, humid areas, in areas prone to freezing, or extreme heat such as an unventilated attic. To do so will void the warranty.
Steamhead to be mounted 12” to 18” above floor or 6” above rim of tub and as far from the seating area as possible.

Service Access
Minimum: 28” W x 18” D x 22” H (35” W with Auto Drain)
**Specifications**

**Models: SMP-12 and SMP-15**

---

**Front Access**

* Add ¼" to the dimension for the louvers

**Front Side View**

---

**Back View**

- ½" Steam Outlet
- ¼" Safety Relief Valve
- ½" Capped Drain Line for Optional Auto Drain

---

**Top View**

- ½" Capped Drain Line for Optional Auto Drain
- Knockouts for Control Cables
