

STEAMIST®

Ganging TSG Generators

NOTE: This applies ONLY to the following models: TSG-7, TSG-10, TSG-12, and TSG-15

For applications where the steam room is large, where multiple steam generators need to be "ganged" together. Please follow the diagram above.

NOTE: Please follow individual installation instructions for each generator. Keep electrical and plumbing separate.

Each generator requires its own steam head. You must NOT install these steamheads any closer than 6 inches. Steam heads must be 12 to 18 inches from the finished floor or 6 inches above the rim of the tub.

S1 DIP Switch Settings for Multiple Steam Generators on Processor Board:

Generator 1:
All Switches to the left
(Factory Default Setting)

Generator 2:
