

STEAMIST®

RESIDENTIAL STEAMBATH SYSTEMS
PRODUCT CATALOG AND U.S. PRICE LIST | JANUARY 2020

Steam Generators Total Sense™ & SM Plus

Steamist offers Total Sense™ or SM Plus Steam Generators. Both have a stainless steel tank for years of dependable service, and save water and energy. The average 20-minute steam shower uses less than one gallon of water. Compare that to a whirlpool tub that holds a minimum of 40 gallons of pre-heated water.

FEATURES OF ALL TOTAL SENSE AND SM PLUS STEAM GENERATORS

- + All models allow the user to enjoy one or more of Steamist's Total Sense Spa Options
- + Compact design permits generator installation in a vanity, a closet or an insulated attic or basement
- + Cable included with generator
- + Lifetime Limited Warranty
- + UL Listed

TOTAL SENSE GENERATORS FEATURE INSTAMIST® AND STEADYSTEAM™

The user can activate the InstaMist feature using any Steamist digital control, and get quick-response steam. In about a minute, the steam shower will begin heating up.

Quiet, continuous SteadySteam technology maintains steam shower environment at the user's preset level, without uncomfortable temperature spikes.

In addition, multiple Total Sense generators can be ganged together for larger steam showers.

Steam Generator Specifications

STEAM GENERATOR SIZING*

For easy generator sizing, visit steamist.com. Use our online Residential Steambath Sizing and Selection Guide. You'll need to have an idea of the shower stall dimensions for more accuracy. The guide will also help you select spa options, controls and accessories. You may also see the back cover for the easy steps to calculate the adjusted cubic footage for your steam shower.

All Steam Generators shown are 240 Volt. For 208 Volt, add "-208" to Product Code. Example: TSG-7-208.

For 208V, current amps will be higher, breaker size larger. Contact Steamist for more information.

For 3-phase TSG and SMP generators, please contact Steamist for special order options.

**90°C copper wire required for connection to generator.

GENERATOR PAN AND AUTO DRAIN PACKAGES

\$580 | GPAD-240 **\$650** | GPXLAD-240
 | GPAD-208 | GPXLAD-208
 for 5-15 kW units for 20-30 kW units

Packages available in 240V or 208V and include all components recommended for field installation with TSG or SMP steam generators*. Generator Pan† features elevated support for generator and solid-brass plumbing connection. Auto Drain will open automatically to purge the system after water in generator cools.

*For installations utilizing more than one Steam Generator, order a quantity of Accessory Packages equal to the number of generators.

†GPAD Pan is high-temperature impact-resistant resin (shown), GPXLAD Pan is galvanized.

Spa Options That Make Total Sense

On the pages that follow, we present four Total Sense™ Spa Options that are available to enhance your steam shower experience. All four of these options are compatible with either TSG (Total Sense) or SMP (SM Plus) Steam Generators. You can order one or more Spa Options individually, or select one of our Spa Option Packages.

AROMASENSE™

CHROMASENSE™

Bring the Total Package Home

OUR TOTAL SENSE™ SPA PACKAGES
INCLUDE 3 EXPERIENCES:

AUDIOSENSE™

SHOWERSENSE™

AromaSense™

Infuse your steam experience with fragrant essential oils. For centuries aromatherapy has demonstrated remarkable therapeutic powers, from relaxing body and spirit to soothing respiration to sparking creativity. And only AromaSense adds 100% undiluted essential oils to the steam shower, ensuring your pure pleasure.

AROMASENSE MODULE:

- + Holds two easily-replaceable 100 ml essential oil canisters, allowing you to select your favorite scent without leaving your steam shower.
- + Pumps just 1/4 drop of pure undiluted oil at a time, so each canister lasts for months.
- + Connects into steamline and needs to be located in a closet or utility room near the steamhead.
- + 11.875" H x 8.125" W x 5.25" D

AromaSense Spa Option

550 Digital Control

The 550 is Steamist's most advanced control system. New upgrade features bring the user increased flexibility in use:

- + A larger high-definition touchscreen display
- + Multiple-language display capability
- + Easily adjustable display font sizes
- + Can be installed in Portrait (vertical) or Landscape (horizontal) orientation

Compatible with Steamist TSG or SM Plus steam generators, the 550 can operate all Total Sense™ Spa Options.

- + Programmable for two user profiles including temperature, duration and spa option preferences
- + Patented dual-temperature sensor technology for superior temperature accuracy
- + 3199 Steamhead included in matching finish
- + Built-in mySteamist Wi-Fi

When installed with a TSG steam generator, it also allows the user to turn the selectable InstaMist® feature on and off.

STREAMING MUSIC CONNECTIVITY

The 550 is preprogrammed for connectivity with iHeartRadio, Spotify and Pandora. If you have Steamist's AudioSense™ spa option, you can link to any of these popular streaming music services and listen to your favorite artists and musical genres as you enjoy your steam shower.

Frequently Asked Questions

IF I SELECT THE TOTAL SENSE 550 OR 450 DIGITAL CONTROL, DO I ALSO HAVE TO INSTALL THE COMPLETE MENU OF AROMASENSE, CHROMASENSE, SHOWERSENSE AND AUDIOSENSE OPTIONS?

No. If you purchase the 550 or 450 Digital Control, you can then select all four Total Sense Spa Options, or choose AromaSense, ChromaSense, ShowerSense and AudioSense as individual Spa Options.

If you purchase a "TSG" or "SMP" generator, but choose not to install any of the Spa Options, you can purchase any of the Steamist Digital Controls (550, 450 or 250) with or without the 220 on/off control.

DO I HAVE A CHOICE OF FINISHES FOR STEAMIST COMPONENTS IN MY STEAM SHOWER?

Yes. Most Steamist controls, as well as the 3199 Steamhead, are available in designer finishes.

WHAT MAKES A STEAMIST STEAM BATH AN "ATTAINABLE LUXURY"?

If you think adding a steambath to your home is a major remodeling project, you may want to reconsider. The compact steam generator can fit inside a typical vanity cabinet, and the plumbing and electrical connections are simple for your professional

installer. In many cases your installer can convert an existing tub/shower into a steambath by enclosing the door so steam does not escape from above.

WHAT ABOUT MAINTENANCE?

The Steamist system is virtually maintenance-free, and is covered by a Limited Lifetime Warranty on the Steam Generators.

CAN MY EXISTING TUB/SHOWER BE CONVERTED TO A STEAMBATH?

Depending on existing circumstances, it may be converted. However, you must get the advice of a qualified professional (a licensed contractor with plumbing and electrical experience) before proceeding with your plans.

WHAT'S THE DIFFERENCE BETWEEN A STEAMBATH AND SAUNA? DOES STEAMIST OFFER SAUNA ROOM SYSTEMS?

First, both steam and sauna systems provide similar benefits for your mental and physical well-being. The difference between a steambath and a sauna is basically "wet heat" versus "dry heat". Sauna room temperatures may actually be higher, but you may "feel the heat" more by adding steam. It really comes down to personal preference. A sauna requires building a separate wooden room

to enjoy the system. A steambath system, however, can generally be more easily integrated into an existing bathroom or new home plan at lower cost. Steamist offers a complete selection of Sauna Heaters and Sauna Room Systems.

DOES MY EXISTING TUB/SHOWER REQUIRE ANY MODIFICATIONS TO MAKE IT A STEAM SHOWER?

Yes. The door and enclosure must be totally enclosed so the steam does not escape from above. A 3/8" gap at the bottom of the door will allow cooler air to enter the shower for a more dense steam experience.

CAN I USE AROMATHERAPY PRODUCTS IN MY STEAM SHOWER?

Yes. The Steamist 3199 Steamhead has a "well" in the top. This allows you to put a couple of drops of essential oils in it. This is a wonderful enhancement to the steam experience. However, do not put oils on the steamhead while steam is being emitted from the head, as there is a possibility for injury due to burning. Caution: Steam is 212°F; in other words, steam is HOT! For aromatherapy, you can also install the AromaSense spa option with your Total Sense system.

DO YOU NEED AN EXHAUST FAN IN THE STEAMROOM?

No. After a steambath take a cool or warm shower and the steam condenses down the drain.

I HAVE VERY HARD WATER. IS THERE ANYTHING THAT I NEED TO DO TO PROTECT MY STEAM UNIT?

You may want to consider a whole-house water treatment system if the water quality is a concern. The Steamist steam generator can operate in conjunction with a water softener. It is important to realize that good water is a condition which is desirable for drinking as well as protecting the plumbing systems, decorative hardware, faucets and glass from the negative effects of hard water. An automatic drain is also available but not required for the generator.

WHAT DO I NEED TO INSTALL A STEAM GENERATOR IN MY HOUSE?

The installation requirements are relatively simple with connections similar to that of a water heater with 240-volt electricity and a cold (or hot) water supply to the unit. A steam line to the bathing area and a glass steam enclosure are all that is necessary to complete the installation.

DOES A STEAM GENERATOR TAKE UP ANY USABLE BATHROOM SPACE?

No. The unit is compact and can be installed preferably up to 50 feet away from the bathing area in a vanity, closet, insulated attic or basement.

IS THE STEAM GENERATOR EASY TO OPERATE?

Yes. Touch and spa controls inside (or outside) the steamroom make it both convenient and very comfortable to relax and enjoy a steambath. With Steamist's Total Sense integrated system, it is easy to control steam, aromatherapy, chromatherapy or music using one touchscreen control.

IS THE STEAM GENERATOR EXPENSIVE TO USE OR OPERATE?

No. Conservative on water (1 - 1-1/2 gallon average) and electricity, Steamist is a very cost-effective way to relax at home. As compared to whirlpool tubs, 2-3 fills of the tub can give the bather a year's worth of steambaths.

CAN I USE A 120V STEAM GENERATOR INSTEAD OF A 240V GENERATOR?

A 120V generator has limited applications. It can be used in small acrylic shower units, which don't have high heat demands due to size and wall materials.

In today's upscale steam showers, demands of time and materials such as marble, travertine, etc., have power requirements which are best served by a 240V generator. Heat loss from an open door can be recovered quickly. This is not possible with a 120V unit. (Ask your sales associate for help in sizing the proper steambath generator to avoid purchasing an improper unit, or refer to the Residential Steambath System Selection Guide or the Commercial Generator Sizing Guide.)

NOTE: Steamist also manufactures 208V generators to match local utilities where this voltage is used.

ARE THERE ANY RESTRICTIONS ON USING A STEAMBATH OR SAUNABATH?

Yes. Doctors consider "steam and sauna" generally healthy to use, but people suffering from heart disease, high blood pressure, diabetes, pregnant women and the elderly who are not in good health should not take a steambath or saunabath without consulting a physician. Women who are pregnant should also consult their physician before use.
